August 23, 2011

Dear Former Imagic Design Ltd customer:

PLC Electronic Solutions Ltd. has recently purchased all the assets, calibration laboratory facilities, and building of Imagic Design Ltd.

PLC Electronic Solutions Ltd. is a designer and manufacturer of robotic camera control systems for the motion picture industry and other wired and wireless robotic control industrial applications.

PLC Calibration is a new division within PLC Electronic Solutions Ltd. and will remain as a third party electronic instrument calibration services provider. Mr. Bruce Wiens is the Technical Director and Manager of the PLC Calibration laboratory. Mr. Wiens has many years of relevant calibration expertise and worked as chief calibration technician for the last eight years for Imagic Design.

Additionally PLC is embarking on an aggressive investment program to make the existing laboratory a state-of-the-art facility in terms of systems, equipment and software improvements. We have applied and are in the process of accreditation under the ISO/IEC 17025:2005 Laboratory Accreditation Standard which in turn will imply compliance with the ISO 9001 Standard. We expect PLC Calibration to be ISO 17025 accredited in the first quarter of 2012.

Building on the solid base provided by Imagic's Quality Management System, laboratory facilities, calibration expertise and equipment allows PLC Calibration to continue offering the same services and level of quality you have relied on in the past. PLC Calibration now offers standard calibration services with a three business day turn-around guarantee.

We take this opportunity to thank you for continuing to use PLC Calibration as an option for your equipment calibration needs. You can reach Bruce Wiens at (604) 430-4083 with any questions, suggestions or requests.

PLC Calibration is now fully operational and can calibrate any of your equipment at your convenience.

Yours truly,

Marc Alfonso
President
